2017 PRIORITIES

In order to make this vision and strategy a reality, Libraries and Learning Services has developed programmes of work relating to each Strategic Direction. This has been integrated with our Libraries and Learning Services Annual Plan and team planning. The following work streams are the priorities for our strategic directions in 2017.

**Student outcomes and success**

**Student success model** - we will develop a model for the future Libraries and Learning Services approach to enabling student success and outcomes in partnership with faculties and related University service divisions and entities, based on the strategic directions, priorities and principles articulated in Libraries and Learning Services vision and strategy.

**Work-related learning model** - we will develop and implement a University work-related learning model to support students and staff with regards to employability.

**Researcher outcomes and success**

**Researcher success model** - we will develop a model for the future Libraries and Learning Services approach to enabling researcher success and outcomes in partnership with faculties and related University service divisions and entities, based on the strategic directions, priorities and principles articulated in Libraries and Learning Services vision and strategy.

**PBRF** - we will prioritise support for the University PBRF project.

**Delivering service excellence**

**Libraries and Learning Services service delivery model** - we will investigate and make recommendations to support student and researcher success models.

**Communications and marketing** - we will develop a communications and marketing strategy and approach, incorporating the needs identified in student and researcher success models.

**Resources and infrastructure**

**Physical collections** - we will implement immediate physical collection priorities and will investigate and develop a plan for long term housing of the collection as a whole.

**E-resources evaluation** - we will develop and implement a framework for aligning resources with current and future needs.

**Collections strategy** - we will develop a long-term collections strategy including Special Collections and digitisation.

**Learning spaces strategy** - we will assess the current state and explore contemporary and future thinking to inform planning and space developments.

**Improvement, relocation and amalgamation** - we will:

  - Implement Engineering Library review outcomes.
  - Improve Tai Tokerau spaces.
  - Relocate Student Learning Services, DELNA and Career Development and Employability Services.
  - Review Creative Arts and Industries, Business Information Centre and Leigh library services.
  - Continue planning and enabling work for Epsom and Tāmaki.

**Web channel** - we will focus on the website and discovery phase two development.

**Digital asset management and preservation** - we will investigate, select and implement a new digital asset management and preservation system.

**Libraries and Learning Services capabilities and how we work**

**Enabling staff programme** - we will develop and implement a programme to provide all staff with opportunities to learn and develop, enabling them to contribute actively to the future of Libraries and Learning Services.
