Printing with Apple Computers

To print from your Apple device you will need to be connected to UoA-WiFi. Information on how to connect to UoA-WiFi are available on our Wireless and Internet page. Connecting to either UoA-Guest-WiFi or eduroam will not enable you to print.

1. To add the FollowMe printers on a mac OS device, open settings and click on Printers & Scanners.

2. Under the list of paired printers, click on the + icon.
3. From the list of printers, scroll down until you find followme-bw and click add.
4. Repeat this step for the printer followme-colour.

![FollowMe-bw Printer Settings]

5. When you go to print you will now be able to choose the FollowMe printers.

![Select FollowMe-bw Printer]

![Access FollowMe-bw Printer Settings]
6. When you send a document to these you will be prompted to enter a name and password for the printer. These want to be your University username and password rather than your computer credentials.

7. After sending your print job, go to any FollowMe printer and tap your Campus (ID) card to authenticate and release the print job.
