

Wireless network instructions

Connecting to the UoA-WiFi network – Mac OS X

Note: This guide is for use with Mac OS X 10.13 (High Sierra) using a built-in Airport card and Safari. Later versions of Mac OS X will likely work in a similar fashion.

Setting up a new location

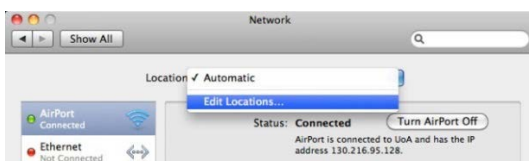

Click the **Apple** icon on the left-side of the menu bar then, click **System Preferences**:

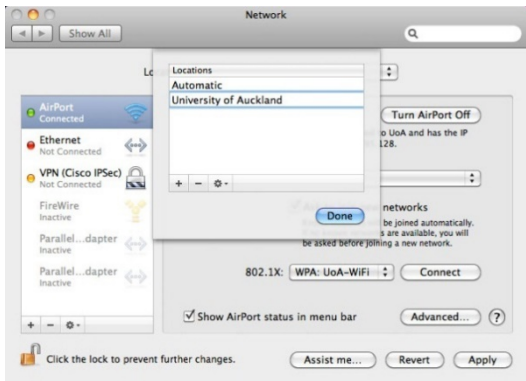

In System Preferences, click **Network**:

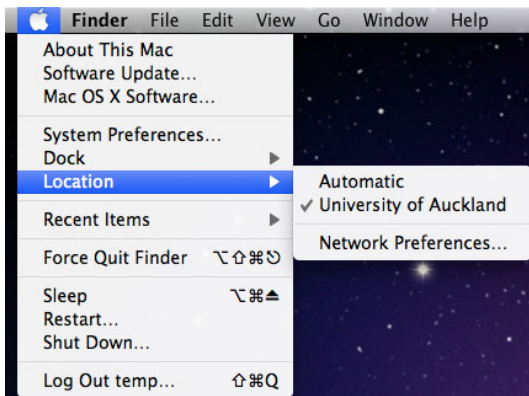

In Network, click the **Location drop-down menu** then, click **Edit Locations**:

To add a new location, click the + icon, type “**University of Auckland**”, click **Done** then, click **Apply**:

When connecting to the UoA-WiFi network, check that this network is selected by clicking the **Apple** icon then, select **Location**. If you're connected, **University of Auckland** will display with a tick mark:

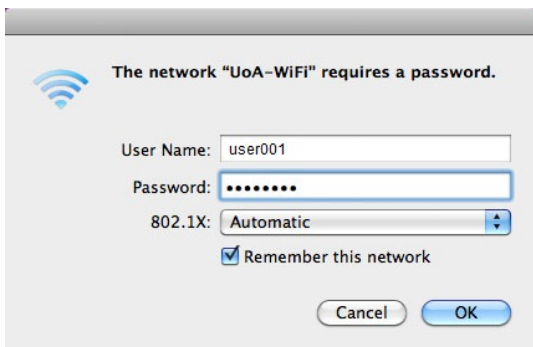

Connecting to UoA-WiFi

Click the **Airport** icon at the top-right of the menu bar then, click **UoA-WiFi**:

Note: If you don't see any available networks, check that your Airport is turned On. This is done by clicking on the greyed-out Airport menu then selecting “Turn Airport On”.

When prompted to log in, enter your University “username and Password” then, click **OK**:

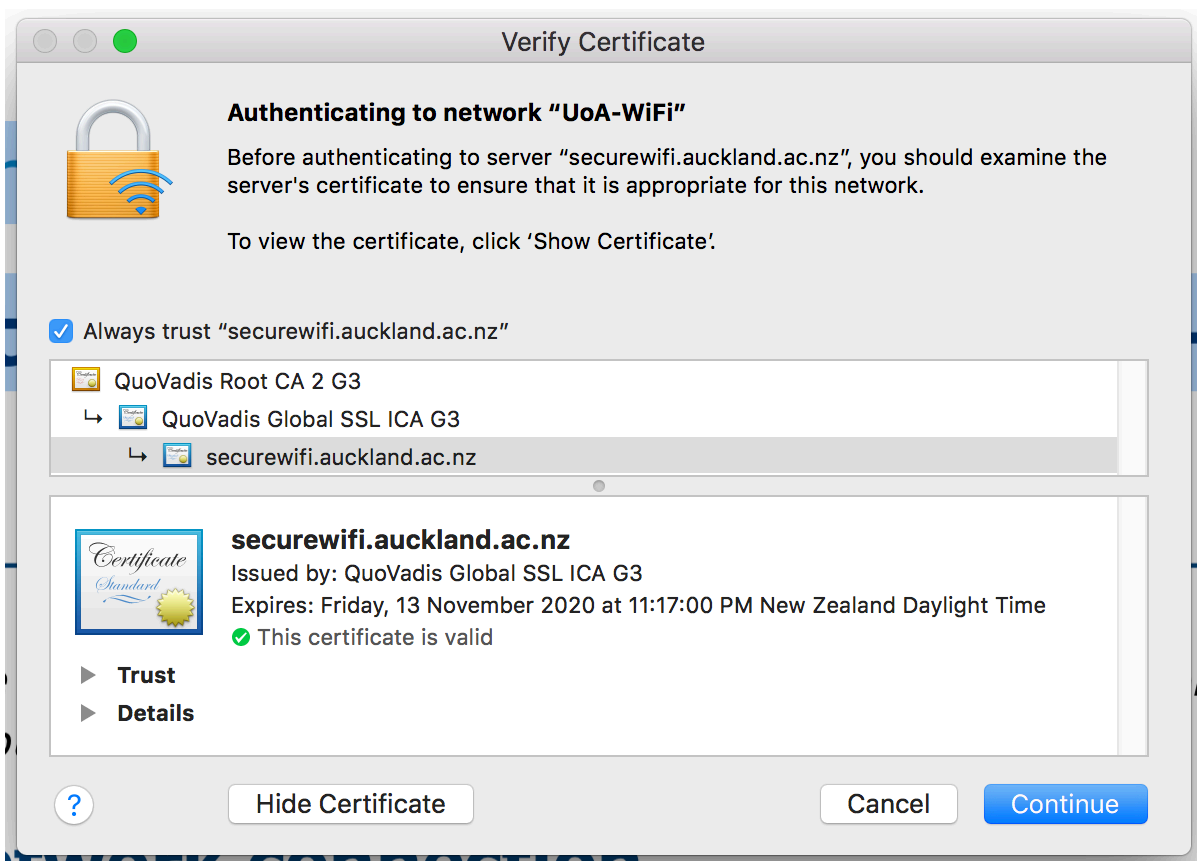

If you also tick “Remember this network”, you won’t need to enter your login details again when using the UoA-WiFi network.

Accepting the security certificate

You may be asked if you wish to accept the security certificate. To see details, click on **Show Certificate**:

Check that the certificate is issued from **securewifi.auckland.ac.nz** and the root certificate is from “**QuoVadis Root CA 2 G3**”

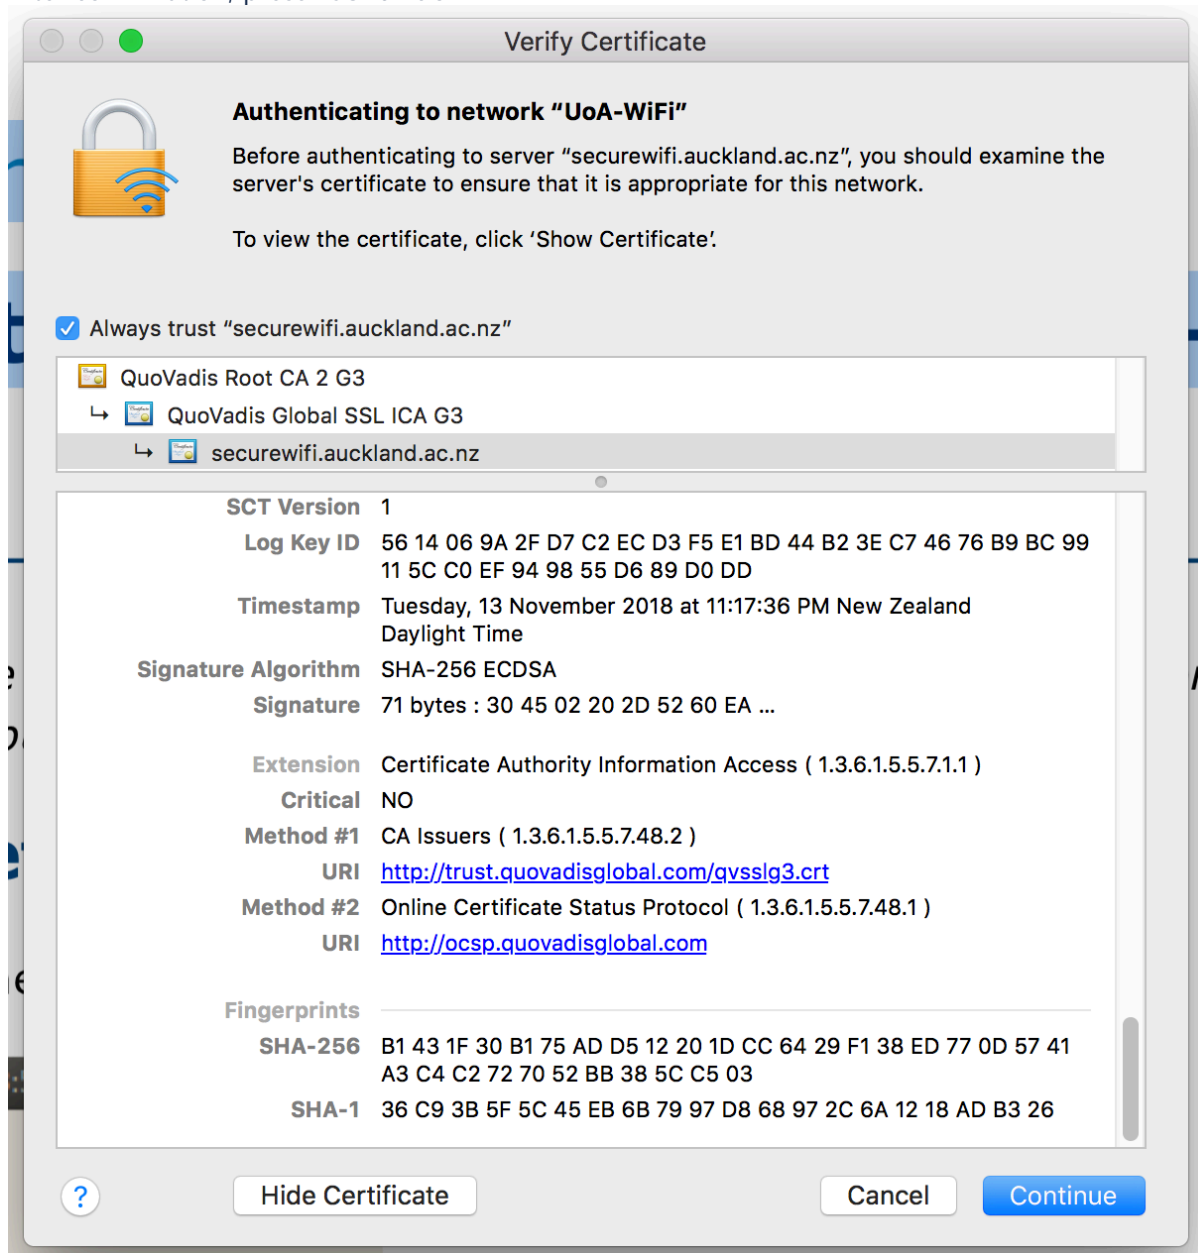

Click on "Details", scroll down and confirm the following fingerprints:

SHA-256: **B1 43 1F 30 B1 75 AD D5 12 20 1D CC 64 29 F1 38 ED 77 0D 57 41 A3 C4 C2 72 70 52 BB 38 5C C5 03**

SHA-1: **36 C9 3B 5F 5C 45 EB 6B 79 97 D8 68 97 2C 6A 12 18 AD B3 26**

After confirmation, press "Continue"

You only need to accept the security certificate the first time you connect to UoA-WiFi.

Note: You may also be prompted to enter your administrator username and password to accept the certificate.
