Wireless network instructions

Connecting to the UoA-WiFi network Windows 8

**Note:** This guide is for use with Windows 8 and its in-built Wireless Zero.

In the “Start” window, drag the cursor to the bottom right corner of the screen:

The “Charms Bar” will display. Hover the cursor over the Sprocket icon:
The “Charms Bar” will change appearance. Select **Settings**:

![Settings Menu]

The “Settings” menu will display. Select **Available**:

![Available Options]
The “Networks” menu will display. Select **UoA-WiFi**:  

![Networks Menu](image)

The “UoA-WiFi” sub-menu will display. Tick the box for “Connect automatically” then, select **Connect**:  

![Connect Option](image)
When prompted, enter your University “user name and password” then, select OK:

It should only take a few moments for “Verifying and connecting”: 
When “Verifying and connecting” is completed, you’ll see the following message: “UoA-WiFi Connected”:

![Image of Wi-Fi connection](image)

**Browsing the internet**

Open your internet browser of choice to access both University and non-University websites.

**Troubleshooting**

If Windows can’t verify the server, you will be prompted to accept the authentication server’s certificate to initiate encryption. To see details, click on **Show certificate details:**

![Image of certificate details](image)
Check that the certificate is exactly as: **AE F5 16 59 1C DA E0 DE A5 A4 F6 4F AA EB 1C C4 C3 43 12 76**. If it is, select **Connect**.
